

Research Summary: Class Start Times and Student Sleep

Redwood State University - Arcadia Falls, California

Department of Psychology. Principal investigator: Rebecca Stein, Ph.D.

Summary

Moving the earliest class start from 8:00 to 9:00 a.m. was associated with 38 more minutes of nightly sleep among participating first-year students ($n = 412$).

Method

Participants wore wrist activity trackers for two weeks in Spring 2025 and two weeks in Fall 2025.

Limitations

Participants volunteered; results may not generalize to all students.

This summary is not a peer-reviewed publication.
